PROJECTS

cycSlope: A route planning web application for users who are looking to choose their routes based on elevation change.

- Technologies: Node.js, AJAX, Express, jQuery, EJS, CSS, Bootstrap, Google Maps API
- Date of completion: 14-Jun-2017
- Github: <https://github.com/merileewheelock/cycSlope>

EXPERIENCE

Q² Laboratory Solutions (formerly Quintiles Laboratories), Marietta, Georgia

Associate Project Manager: November 2016-March 2017

- Lead Global Lab Project Team for clinical trials.
- Manage all laboratory aspects of clinical trials from start up to completion, including giving input into the design of the study, monitoring plan, and all study specific documents related to the trial.
- Develop start-up plans including monitoring and communication plans, tracking milestones and timelines, risk management and action logs. Lead problem solving and resolution efforts in a timely manner.
- Perform the technical review at program/project initiation and provide input into project proposals as well as lead discussions around budget implications and changes.

Lead Project Coordinator: April 2015-November 2016

Senior Project Coordinator: September 2013-April 2015

Project Coordinator: January 2012-August 2013

Problem Solving and Educational Technology Research Lab, Georgia Tech, Atlanta, Georgia

Research Assistant: May 2010-April 2011

- Directed participants in experiments.
- Developed a coding scheme used to analyze data in an experiment.
- Data entry using Microsoft Excel and SPSS/PSAW.

EDUCATION

DigitalCrafts, Atlanta, Georgia: 2017

Georgia Institute of Technology, Atlanta, Georgia
